## ABSTRACT:

PURPOSE: To prevent use of a facsimile equipment without permission by monitoring a dial lock signal from an automobile telephone mobile set and informing it to the facsimile equipment when the state of dial lock is detected so as to stop the function of the facsimile equipment.

CONSTITUTION: The telephone set is provided with a lock state detection means detecting a dial lock signal caused by the operation of a handset 2 and outputting a lock state signal to a facsimile equipment 60 and an operation inhibit control means receiving an operation inhibit signal of the lock state signal and stopping the function of the facsimile equipment 60. Then the lock state detection means monitors the dial lock signal by using an outgoing serial signal from the automobile telephone mobile set 1 and discriminates what the signal representing the lock state means when an identification signal of the dial lock is caught and informs it to the facsimile equipment 60 when the dial lock state is detected to stop the function of the facsimile equipment 60. Thus, use of the facsimile equipment 60 without permission is prevented.
